OFFICE OF LEGISLATIVE COUNSEL

Tuesday - 13 June 1967

STAT

1. [ ] Spoke with Mr. Ernest Baynard, Staff Administrator, House Subcommittee on Government Activities, and learned that the Subcommittee was soon to embark upon hearings concerning the level of ADP effort in the Federal Government. Apparently this will be related to an examination of the factors which contribute to ADP utilization and will attempt to make an appraisal of the level of effort by the Federal Government over the next four to five years.

Mr. Baynard also advised that on 22 June 1967 the Subcommittee will schedule a one day hearing on the subject of painting contracts for Federal buildings. Baynard explained that due to their findings mention will be made of painting deficiencies occurring at the Agency Headquarters location, but he assured me that the Chairman's remarks and questioning will clearly point out that GSA and not the Agency had full responsibility in this area. Baynard volunteered that dropping the Agency building from among the Federal buildings to be dealt with in the hearing might create backlash. I thanked Baynard for the consideration he had given to our interests and said I would drop by to pick up the data he will be using in connection with the Agency building.

STAT

2. [ ] Spoke with Miss Posey, in the office of Congressman John J. Rhodes (R., Ariz.), in connection with her earlier request for a copy of the March 1967 issue of News from Ukraine and told her that there were several publications by that name. She said the one that they were interested in contained an item to the effect that a member of the insurgent Army, Aleksa Hryha, had been apprehended and sentenced to die before a firing squad. This individual is apparently related to General Onelianowytch Pawlenko.

(BR, RI, and the Library have not been able to identify the publication requested by Mr. Rhodes office. CA Staff is sending us a copy of a publication by Radio Liberty called "News from Ukraine.")
